The Handy Skiff

A Traditional Maine Boat!!

The Handy Skiff is a traditional rowing boat built here in our fiberglass shop at Handy Boat by our craftsmen in Falmouth Maine.

It's lightweight appeal classifies it as a car topper so no trailer is needed.

If rowing is not your style the boat can accommodate a small out-board motor.

With its graceful lines, three person capacity, solid fiberglass construction, Coast Guard approved flotation; this is a boat you can feel proud to own and give you many good service of years.

Colored versions available upon request for an additional fee

A sailing version can also be manufactured for custom orders.

Kit versions are a possibility.
